

LEGO CHALLENGE: Build a Robot

THE CHALLENGE: Use LEGO bricks to build a robot. Give your robot a name, a job, and a story.

Have you ever dreamed of building a robot that could do anything you wanted? Use Lego bricks to design a prototype of the robot you would like to build. Think about what jobs the robot can perform as you design it. Where does your robot come from? Can you think of a cool name for your robot? The more creative you are the better!
